### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not fairly teach or suggest an optical measuring system wherein the measured signal is a logarithmic difference signal between detection signals. The double patenting rejections are herein withdrawn because the patented claims do not recite this critical limitation.

For clarification purposes, the Examiner respectfully disagrees with Applicant's comments regarding statutory double patenting being the only anticipatory double patenting rejection. The Examiner respectfully disagrees because according to *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993), when the application claim is broader than the patent claim then the broader claim is anticipated by the more specific claim. Therefore, Applicant's Representative is incorrect in the assertion that the only anticipated double patenting rejection is statutory double patenting and that all obviousness double patenting rejections require the analogous obviousness analysis as a 103 rejection.

However, upon further reconsideration by the Examiner the current claims are narrower or more specific in scope in view of the limitation regarding the logarithmic difference signal between detection signals of the detectors as argued by Applicant's Representative in the After-Final Response. As such the double patenting rejections are withdrawn.

### *Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
